

The Problem

D2C Brands Lose Revenue Due to Failed Deliveries

Key Challenges

- ✗ High RTO (Return to Origin)
- ✗ High NDR (Non-Delivery)
- ✗ Customer Unreachable
- ✗ Courier Underperformance
- ✗ Poor Courier Allocation
- ✗ Lack of Operational Visibility
- ✗ Manual Analysis

Business Impact

Example Seller

10,000 Orders / Month

Delivery Rate:

65%

Orders Failed:

3,500

The Failure Chain

■ Order Placed

■ Dispatched

■ ■ NDR

■ Reattempt

■ RTO

■ Revenue Loss

How JAGGU Works

From raw shipment data to actionable intelligence in seconds

DATA PIPELINE

■ Seller Data

■ Velocity GDI

■ JAGGU AI

■ Root Cause

■ Recommendations

■ Improved Delivery %

♥■ Seller Health Score

Health Score 0–100 · Benchmark comparison · Risk flags

■ Courier Intelligence

Delivery rate by courier · Allocation recs · Concentration risk

■ Product Intelligence

Top selling · Highest RTO · Revenue at risk by SKU

■ Pincode Intelligence

Opportunity · Risk pincodes · NDR clusters · Courier mismatch

■■ VAS Recommendations

AI Calling · WhatsApp NDR · Courier Optimization · NDD

JAGGU RESPONSE FORMAT

■ Observation

What the data shows — with real numbers

■ Root Cause

Why it's happening — courier, state, product

■ Recommendation

Specific Velocity action — not generic advice

■ Expected Impact

Recoverable shipments or delivery gain

Business Impact

What changes when JAGGU is activated

■ BEFORE JAGGU

10,000 Orders / Month

65% Delivery Rate

3,500 Orders Failed

- ✓ WhatsApp NDR → 8% COD RTO
- ✓ Courier optimization per state
- ✓ Pincode COD restrictions
- ✓ Order Confirmation pre-dispatch

JAGGU ACTIVATES

■ AI Calling

38% NDR recovery rate

■ WhatsApp NDR

8% COD RTO reduction

■ Order Confirm

12% pre-dispatch block

■ Courier Optimize

State-level rebalancing

■ Pincode Block

Zero-cost COD restriction

■ NDD Activation

Zone A/B next-day delivery

Why JAGGU Wins

From reactive dashboards to proactive AI consulting

Hackathon Demo Ready · Production Architecture · Velocity Integrated

■ Without JAGGU

- ✗ Manual analysis in Excel/Sheets
- ✗ Multiple disconnected dashboards
- ✗ Reactive — act after damage done
- ✗ Slow decisions (days, not seconds)
- ✗ No courier intelligence
- ✗ No VAS adoption guidance
- ✗ Generic, not seller-specific

■ With JAGGU AI

- ✓ AI KAM — instant consultant
- ✓ One unified intelligence engine
- ✓ Proactive — act before damage
- ✓ Instant decisions (seconds)
- ✓ Courier optimization per state
- ✓ VAS recommendations by impact
- ✓ Personalised per seller/SKU
